Hi Cheryl,

Please submit the ARF asap, even if you don't have all the details yet. 90 samples is a lot to handle for short hold time analyses (e.g. nitrate 48 hrs) and I would like to initiate internal dialogue promptly. How many samples would be submitted daily? We also aren't fully functional in our organics lab yet.

Total solids is only for solid samples (i.e. total solids is the same as percent solids/moisture content). TSS and TDS are for waters.

You can request nitrate-nitrite and also nitrate as N (select anions on the request form, and write nitrate as N on page 4 in the subset request) separately, but it will require separate bottles and preservatives.

Thanks.

Subject: Analytical Request for the WECAB Branch

Hi Rob:

I am submitting a request form, but I don't anticipate that it will be 150 samples more like 90 samples between April 30 - May 5, I can let you know by Monday, April 16, 2018. I wanted to make sure I was on your list because we would like to have the turn-around time for these samples as quick as possible.

Questions:

1. I wanted to request Total Dissolved Solid is that the same as Total Solids in Water Samples?
2. I also wanted both nitrate – nitrite, but also nitrate alone is that possible?

If you have any question, please let me know.

Sincerely,

Cheryl Burdett
